Subject: AVERT-based regional emissions rates for CPPD

Robyn,

I think we didn't define the fraction of energy (or total energy amount?) that should be represented in the displaced emissions rate from AVERT. As you pointed out, we had previously used 3% and 5% in two different papers. Do you have a preference? My inclination is to go with 5% as a round number; I think there will be little to no difference between them, but we should define ahead of time.

Please cc Ariel on response

-Jeremy
